

## DEPARTMENT OF ANTHROPOLOGY

Add secondary cross listed course:

ANTH 301 – South Asian Cinema: Bollywood and Beyond

3 Credit Hours

(See Asian Studies 301.)

Add new courses:

ANTH 312 – Agri-Cultures and Eats

3 Credit Hours

Explores growing, cooking, and eating food using anthropological evidence and perspectives from past and present cultures, and considers future issues related to food in changing societies and environments.

(RE) Prerequisite(s): 130 or 137.

ANTH 321 – Anthropology of South Asia

3 Credit Hours

With primary emphasis on the Indian subcontinent, this course introduces students to the cultures, histories, and politics of South Asia. It focuses on classic and contemporary ethnographic accounts, with a view towards examining the richness and diversity of everyday life, as well as introducing theoretical debates in the anthropological study of the region.

ANTH 349 – Well-being, Livelihood and Society

3 Credit Hours

Examines concepts of well-being and livelihood in both social and global perspective. The principal biological and cultural influences upon well-being and livelihood are identified and located in a broader economic, social and ecological context. Methodologically, this unit relates the traditional anthropological focus upon the local community and small-scale society to the wider national and international picture of well-being in the past as well as in the present.

ANTH 422 – Anthropology of Global Inequality

3 Credit Hours

Survey of the study of global inequality, exploring the problem of inequality through a range of theoretical and ethnographic accounts in anthropology and related disciplines. Emphasis on poverty and structural inequality in the contemporary world in relation to neoliberalism, globalization and climate change.

(RE) Prerequisite(s): 130 or 137.

ANTH 423 – Anthropology of Gender

3 Credit Hours

Introduces debates and perspectives in the anthropological study of gender and gender relations. Examines different approaches to the study and conceptualization of gender across the globe, with a

focus on how gender and sexuality are related to other social practices and categories, including ethnicity and race, socioeconomic status, nation, citizenship, etc. The course fosters an appreciation for the rich diversity of human practices and beliefs connected to gender in the U.S. and abroad.

#### ANTH 425 – Humanitarianism

3 Credit Hours

Provides a critical survey of theoretical and ethnographic studies of modern humanitarianism, with particular emphasis on the relationship between humanitarianism and cultural, economic and political orders associated with global capitalism. Explores critical questions around democracy, development, human rights and social justice in relation to the ideologies and practices of humanitarianism.

(RE) Prerequisite(s): 130 or 137.

#### ANTH 441 – Topics in Cultural Method and Theory

3 Credit Hours

Variable topics focusing on contemporary issues in cultural anthropology method and theory. Writing emphasis course.

Repeatability: May be repeated. Maximum 6 hours.

(RE) Prerequisite(s): 130 or 137.

#### ANTH 449 – Big-data Anthropology

3 Credit Hours

Big-data research is now a major part of the social sciences, including anthropology. This course combines lectures with practical tutorials in computational approaches using digital data on cultural change, from ancient to contemporary social media. Students are encouraged to bring a laptop, but no programming experience is required.

(RE) Prerequisite(s): 130 or 137 or 210.

#### ANTH 455 – Archaeological Foodways

3 Credit Hours

This seminar class is designed to survey the complex behaviors by which humans produce, prepare, present, and consume foods and the various methods used by archaeologists (including paleoethnobotany, zooarchaeology, osteology, residue analysis, and other artifact analyses) to address foodways and larger interpretations of lifeways at archaeological sites.

(RE) Prerequisite(s): 120 or 127.

#### ANTH 460 – Paleoethnobotany

3 Credit Hours

This seminar class provides advanced undergraduate students a comprehensive understanding of the methods and applications of paleoethnobotany within archaeology, as well as providing some hands-on experience in working with archaeological plant remains.

(RE) Prerequisite(s): 120 or 127.
